PROFESSIONAL SUMMARY

Rochester-based infrastructure professional with MSP, healthcare, and field-engineering experience. I administer, troubleshoot, automate, and improve Windows, identity, endpoint, network, and cloud environments.

75%

reduction in endpoint setup time

~150

MSP clients supported within a three-person team

45,000

employees in the healthcare environment supported

CORE CAPABILITIES

CORE INFRASTRUCTURE

Windows Server, Active Directory, Group Policy, Endpoint imaging, Workstation deployment, Server and storage hardware

MICROSOFT CLOUD & ENDPOINT

Microsoft 365, Entra ID, Identity administration, Endpoint deployment, Windows deployment

NETWORKING & SECURITY

SonicWall, Wireless access points, Network drops, Server network integration, Hardware diagnostics

AUTOMATION & TOOLING

PowerShell, Python, Microsoft SQL Server, Git, GitHub Actions, Batch, Docker

TECHNICAL EXPERIENCE

Technical Engineer | Microworx

April 2024 - Present

- Build and improve internal deployment, imaging, benchmarking, and ticketing tools using VSS live imaging, Python, JavaScript, and SQL workflows.
- Developed a VSS live-imaging and delta-merging workflow to reduce recurring software costs and endpoint deployment time.
- Modernized legacy Perl, PHP, and SQL ticketing workflows into a more maintainable Python-based internal system.
- Partner with business clients on technical support, system design, hardware specifications, and project execution.
- Diagnose varied technical issues and design practical systems for server, desktop, and laptop requirements.

Environment: Windows endpoint deployment, VSS live imaging, Python, JavaScript, Microsoft SQL Server, Perl, PHP, Servers, Desktops, Laptops

Hewlett-Packard Enterprise Field Technician | HEMMERSBACH US LLC

May 2023 - Nov 2023

- Handled 2-5 daily field service tickets across routes up to 400 miles for enterprise hardware repair.
- Repaired HP laptops, desktops, A3/A4 printers, servers, and storage hardware in client environments.
- Performed component replacement, diagnostics, hardware installation, and server network integration.
- Maintained clear field communication while working independently across varied customer sites.

Environment: HP enterprise servers, Storage, A3/A4 printers, Laptops, Desktops, Hardware diagnostics, Network integration

Network Engineer | Simple Tech Innovations

Nov 2022 - May 2023

- Built deployment automation that reduced new-computer setup time by 75% and improved consistency.
- Supported roughly 150 MSP clients as part of a three-person technical team.
- Delivered remote help desk support, on-site troubleshooting, equipment repair, and new hardware deployments.
- Installed and supported computers, printers, access points, network drops, and related infrastructure.

Environment: Windows deployment, MSP support, Batch automation, Workstations, Printers, Wireless access points, Network drops

EXPERIENCE CONTINUED

Help Desk - IT Analyst | University of Rochester Medical Center

March 2022 - Oct 2022

- Supported an enterprise healthcare environment serving 45,000 employees, 20,000 devices, and 400+ applications.
- Worked in a 15-person help desk team handling 500-1000 daily calls.
- Built an Active Directory export tool that reduced large user-information requests from hours or days to seconds.
- Supported Active Directory, Citrix Workspace, ServiceNow, Epic access issues, account permissions, malware cleanup, and password resets.

Environment: Active Directory, Citrix Workspace, ServiceNow, Epic, Windows endpoints, Account permissions, Enterprise healthcare IT

Game Repair and IT Support | Dave and Buster's, Inc

March 2021 - March 2022

- Repaired arcade hardware, including component-level troubleshooting and full cabinet rebuilds.
- Maintained software for game systems and internal workstations.
- Provided staff IT support for printers, passwords, and workstation issues.

Environment: Arcade hardware, Windows workstations, Printers, Component diagnostics

SELECTED INFRASTRUCTURE CASE STUDIES

Endpoint Imaging & Deployment Automation

Problem: New-computer setup required more than an hour of repetitive manual configuration per machine. **Action:** Built customizable automation to apply software, configuration, and deployment steps consistently. **Result:** Reduced setup time by 75% while improving repeatability across client deployments.

Technologies: Batch, Windows Deployment, Endpoint Administration

Active Directory Reporting Automation

Problem: Requests covering hundreds or thousands of accounts could take hours or days to assemble manually. **Action:** Created an export utility that collected the required account data in a consistent format. **Result:** Reduced turnaround from hours or days to seconds.

Technologies: Active Directory, Scripting, Group Policy

Internal Ticketing & POS Operations System

Problem: Tickets, time, pricing, parts, and computer-build details needed one maintainable operational record. **Action:** Built a Python and JavaScript application with MSSQL-backed tracking and POS integration. **Result:** Centralized service and build operations in one internal workflow.

Technologies: Python, JavaScript, MSSQL, POS Integration

CREDENTIALS & EDUCATION

CompTIA A+ - CompTIA

SonicWall Network Security Administrator (SNSA) - SonicWall

3CX Basic Certified Engineer - 3CX

HP Enterprise Server Service Certification - HP

HP A3/A4 Printer Repair Certifications - HP

TRAINING

Microsoft SC-300T00-A Training - Identity and Access Administrator - Microsoft

EDUCATION

High School Diploma - Irondequoit High School, 2017
